

## Alaska After 3PM

In 2009, Alaska parents/guardians were asked about their children's regular participation in various after school care arrangements, with a special focus on afterschool program participation and satisfaction. The *America After 3PM* survey identified the supply of and demand for afterschool programs, as well as the major barriers to program enrollment.

### After School Care Arrangements

- **40% (54,728)** of Alaska's K-12 children are responsible for taking care of themselves after school. These children spend an average of **8** hours per week unsupervised after school.
- **18% (24,566)** of Alaska's K-12 children participate in afterschool programs. On average, afterschool participants spend **6** hours per week in afterschool programs. Participation averages **3** days per week.
- **71%** of Alaska K-12 children spend some portion of the hours after school in the care of a parent or guardian.
- Other care arrangements include traditional child care centers (**18%**), sibling care (**17%**) and non-parental adult care, such as a grandparent or neighbor (**38%**).

Notes: The maximum amount of time in after school care arrangements is limited to 15 hours per week, which reflects the after school hours of 3:00 to 6:00 p.m. Care arrangements add up to greater than 100% due to multiple regular care arrangements for many children.

### Satisfaction with and Support for Afterschool Programs

- **95%** of Alaska parents are satisfied with the afterschool program their child attends.
- Alaska parents cited child enjoyment (**61%**), convenient location (**58%**) and ability to provide a safe haven (**58%**) as their top three reasons for selecting an afterschool program.
- **89%** of adults surveyed in Alaska agree that there should be "some type of organized activity or place for children and teens to go after school every day that provides opportunities to learn" and **75%** support public funding for afterschool programs.

### Need or Demand for Afterschool

- **35% (39,170)** of all Alaska children not in afterschool would be likely to participate if an afterschool program were available in the community, regardless of their current care arrangement.
- Parents of non-participants believe that their children would benefit most from afterschool programs in the following ways: by having fun, improving their social skills, improving their physical activity and overall health, receiving academic enrichment and improving their workforce skills.

## Alaska After 3PM

### Barriers to Enrolling in Afterschool Programs

- After lack of need, the predominant obstacles to enrollment include preference for alternative activities, cost and concerns about program quality.

### Contextual Information about Afterschool Programs

- In Alaska, the public schools are the largest provider of afterschool programs. Boys & Girls Clubs, CampFire Programs, YMCAs and religious organizations round out the top five major providers of afterschool programs in the state.
- On average, Alaska families spend **\$69** per week for afterschool programs.

### National Comparison and Trends – 2004 to 2009

	2009		2004	
	Alaska %	National %	Alaska %	National %
Percentage of Kids in Afterschool Programs	18	15	21	11
Percentage of Kids in Self Care	40	26	20	25
Percentage of Kids in Sibling Care	17	14	9	11
Percentage of Parents Extremely/Somewhat Satisfied with Afterschool Program	95	89	58	91
Percentage of Kids Who Would Participate if an Afterschool Program were Available	35	38	31	30

### About America After 3PM

In Alaska, 269 households were surveyed for this study. Among those households, 26 percent qualified for free or reduced price lunch, 5 percent were Hispanic and 3 percent were African-American. According to U.S. Department of Education data from 2005-2006, the total school enrollment in Alaska is 136,480, which is the foundation for all statewide projections in Alaska After 3PM.

*America After 3PM was sponsored by the JCPenney Afterschool Fund. Between March and May 2009, 29,754 parents/guardians responded to survey questions about their after school child care arrangements during the 2008-2009 school year. RTi, a market research firm, conducted the survey and analyzed the data for the Afterschool Alliance. Additional information from America After 3PM is available at [www.afterschoolalliance.org](http://www.afterschoolalliance.org).*
